

# Introduction of EU Legislation for the organics

## Introduction on legal acts

Since 1 January 2022, [Regulation \(EU\) 2018/848](#) of the European Parliament and of the Council of 30 May 2018 is the applicable legislative act, also known as the basic act, laying down the rules on organic production and labelling of organic products, repealing and replacing Council [Regulation \(EC\) No 834/2007](#) of 28 June 2007. The new regulation provides for transitional periods for the implementation of certain new provisions, in particular on trade. Please refer to section 2 of Chapter IX of Regulation (EU) 2018/848, where provisions under previous Council [Regulation \(EC\) No 834/2007](#) and Commission [Regulation \(EC\) No 889/2008](#) may apply for a limited period.

In addition, a further legislative act was published in 2023, providing for specific labelling requirements for pet food produced in accordance with the rules laid down in Regulation (EU) 2018/848:

- [Regulation \(EU\) 2023/2419](#) of 18 October 2023 on the labelling of organic pet food (OJ L, 2023/2419, 27.10.2023).

It is on the basis of Regulation (EU) 2018/848 that the Commission adopts further detailed secondary legal acts.

The types of secondary legal acts are the following:

- delegated acts, also known as Commission Delegated Regulations, which are acts of general application to supplement ( “Commission Delegated Regulation supplementing” ) or amend ( “Commission Delegated Regulation amending” ) certain non-essential (in the sense of complementary) elements of the legislative act;
- implementing acts, also known as Commission Implementing Regulations, which are used where uniform conditions for implementation are needed.

Delegated acts amending the basic act are progressively incorporated into the so-called “consolidated” text of the legislative act and become part of it. Please note that the [consolidated version of Regulation \(EU\) 2018/848](#) is made available only for informative

purposes, but has no legal effect. The authentic versions of the relevant acts, including their preambles, are those published in the Official Journal of the European Union and available in [EUR-Lex](#).

The list of secondary acts concerning organic farming covers three main areas: production and labelling, controls and trade.
